

FENTANYL TESTING KIT

Fentanyl has become a problematic narcotic when encountered in the field. Forensics Source recommends the sequence below when testing for Fentanyl. Utilizing a sequence versus a single test will assist the investigator in determining the likelihood that Fentanyl is presumptively present in the seized narcotics.

This test kit, NIK 6060S, from NIK Public Safety will provide the investigator with 10 testing sequences plus a box of acid neutralizer.

NIK 60-Paq Special 6060F CopQuest No. 43-2025-000

Includes the following tests:

NIK Test A	800-6071
NIK Test B	800-6072
NIK Test I	800-6089
NIK Test K	800-6080
NIK Test W	800-6088
NIK Test F	800-6076

NOTE: Be mindful of potential harmful effects when dealing with Fentanyl. Always use personal protection when handling substances that you suspect may be Fentanyl including breathing apparatus, protective clothing and double gloves.
